Rugged Tablet POS

The new tPOS series is a Windows based Point of Sale solution that is designed for durability and performance. It has gone through rigorous testing and is certified with an IP Rating of 54 for dust and water resistant, and able to withstand up to 150cm drop.

Reliability

Adjustable and ergonomically designed Hand Strap

LEFT HAND

RIGHT HAND

The hand strap is usable for both left and right-handed users and can be vertically or horizontally rotated according to individual preference.

A longer shoulder strap is also available in the hospitality package and is handy for long-term users whereby the device can be carried over their shoulders.

This not only brings convenience but also prevents accidental drops particularly during busy periods.

Versatile Docking Configuration

The tPOS series comes in various docking configuration to cater to the different needs of a business.

With printer docking station

Wall mount docking station

Desk docking station

Battery charging bar
